

Javadd-02001**Texturing agent additive****Introduction**

Texturing agent Javadd-02001 is a strong and effective surface active additive formulated to dry blend with coating powders to achieve wrinkle surface. Javadd 02001 is designed specifically for powder coating containing “flow and leveling agent”. It could easily change smooth surface of this group into a medium-fine wrinkle finish.

Typical properties:

Main active raw material	Acrylate base polymers
Appearance	White powder
Active percentage	98-100
Nonvolatile content	≥98%

Application:

- can easily mix with micronized powder coating in blender.
- Javadd 02001 is compatible with powder coating systems such as pure epoxy, hybrid, PES/TGIC or PES/HAA and PU

Suggested Dosage:

- For black and dark colours : 0.6%-0.8% by weight/powder coating formulation
- For white and bright colours : 0.8%-1.5% by weight /powder coating formulation

Use method: Dry blend with micronized coating powder in blender

Packaging: Net weight 15kg per bag and 450-1000 kg per pallet.

Storage:

Store in dry place and temperature between 2-32°C, away from direct sunlight and fire. If the above conditions are met, the products can be kept in stock for at least two years.

Safety:

When handling these products, wearing glasses, gloves and work clothes is advised. Read the instructions in the material safety data sheet for further information.
